FactoryMate™

Re-imagine where Quality can take You

FactoryMate™ is an IoT + Cloud based manufacturing intelligence platform that enables enterprise-wide visibility into manufacturing quality data, giving intelligence that leads to improvements and business transformation.

Fast and easy access to insights that change the way you do business

With FactoryMate™ you get to analyze your production and quality data across all production units.

One Line

One Site

Multiple Sites

FactoryMate™ helps you visualize and efficiently manage your manufacturing operations. Whatever the size of your company,

**Streamline
Production**

**Simplify
Communication**

Reduce Costs

**Pin Point
Improvement
Opportunities**

FactoryMate™ gathers information from any of your data sources and stores it in standardized format.

FactoryMate™ then compares data across multiple Production Lines, Manufacturing Plants and even Countries

FactoryMate™ delivers
Reminders, Notifications
Real-Time Views and
On-Demand Reports

Users can filter and tailor content according to Product, Shift and Process.

FactoryMate™ SaaS
model enables Easy
Scalability and
Flexible
Deployments with
the Highest Security
